

ØKOSORT 2

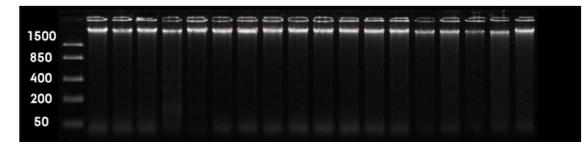

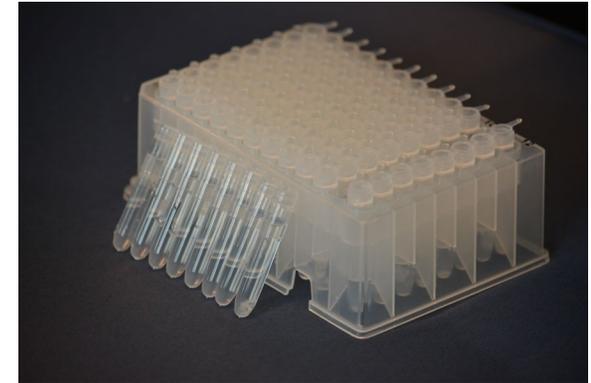

Genotyping-WP4

Jihad Orabi

GENOTYPING MATERIAL

- Spring wheat (WP1)
 - Each year about 100 lines
- Spring barley (WP2)
 - Each year about 100 lines
- DNA extraction
 - From 10 days old seedlings
 - Ammonium acetate protocol
 - Quantity and quality are adjusted
- Genotyping
 - TraitGenetics (Gatersleben, Germany)

GENOTYPING

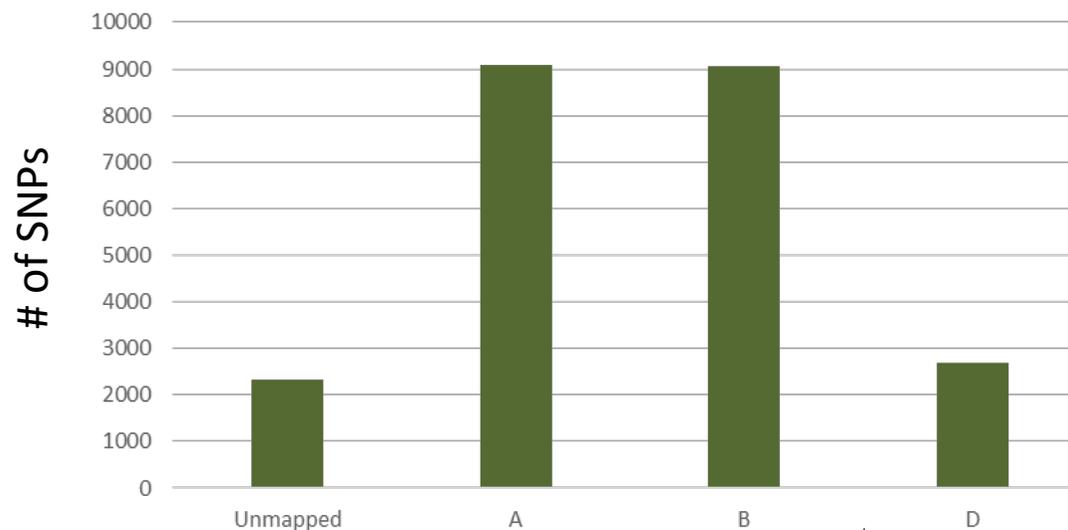

Spring wheat (WP1)

- 25K Infinium SNP array
- 24145 markers on the array
- 21693 physically mapped
- 12401 genetically mapped

Spring wheat (Økoll material)

- 25K Infinium SNP array
- 23160 amplified
- 20845 physically mapped
- 12024 genetically mapped

Distribution of SNP marker over wheat genome

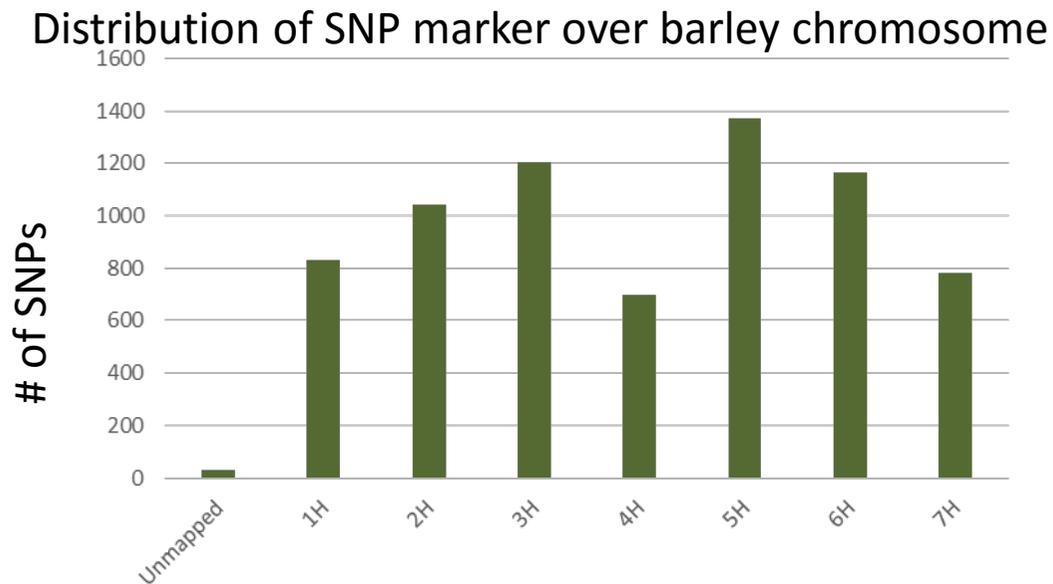

GENOTYPING

Spring barley (WP2)

- 15K XT Infinium SNP array
- 13847 markers on the array
- 13401 physically mapped
- 7712 genetically mapped

Spring barley (Økoll material)

- 15K XT Infinium SNP array
- 13783 amplified
- 13370 physically mapped
- 7710 genetically mapped

THANK YOU FOR LISTENING
